

INFRASTRUCTURE

The infrastructure of our school includes

- **CIVIL STRUCTURE**

Includes ground floor, first floor and second floor

- **SUPER STRUCTURES**

A spacious & well-furnished lobby area accommodating 30-50 parents at a time.

- **CLASS ROOMS**

Digital and fully air-conditioned seating arrangements, the classes also hold the individual cabinets for each student to keep their belongings.

- **LABORATORIES**

The second floor is well – equipped with **PHYSICS, CHEMISTRY, BIOLOGY, MATHS, COMPOSITE LAB, COMPUTER LAB AND ROBOTICS LAB**

- **LIBRARY**

A wide range of reading material which includes story books, journals, academic material & encyclopaedia are made available for the children.

- **PLAY FIELDS**

An extended playground which includes cricket pitch, football ground basketball court, lawn tennis court, skating track, re-creational swings & trampoline and a well – structured mini- gymnasium.

- **FACILITIES**

The ground floor facilitates an **Admission Room**, hygienically equipped **INFIRMARY** with full- time trained nurse and a **COMPUTER LAB** with working computers & wifi connectivity.

To cater to the artificial intelligence of the learner a mechanised **ROBOTICS LAB** with trained IT people is arranged. Next to which is the **MUSIC ROOM** with musical instruments and recording units.

A well-organised **MESS** with a seating capacity of 200-250 at a time is available. Hygiene & cleanliness is the special feature of the mess, eatables are appetizing, a child friendly and care is taken to provide a well-planned daily menu which includes a balanced diet.

For aquatic education and to teach children water life safety skill the school has a well-managed and maintained mini–Olympics size **SWIMMING POOL**. Swimming lessons are given by trained teacher.

To enhance the art and creative skills of the children an **ART ROOM** with all the art requisite material is set for the children. The second **ACTIVITY HALL** is at the extreme end of the second floor.

- **AMENITIES**

Every floor has separate girl's and boy's washroom with a full-time helper.

WATER COOLER! An alternative to individual water bottles is provided to the children by the installation of a RO water cooler on the ground floor and another one in the mess.

TRANSPORTATION! Children coming from different corner of the city are provided air-conditioned Bus and Van facility keeping in mind all the safety measures required for the same. A female attendant is stationed in each bus.

An extra feature of the school building is the provision of the **LIFT** which can be accessed both by the Staff and Special Learners.

Building safety measures are prominently taken care by the school authorities by the installation of **FIRE EXTINGUISHERS** on all the floors and in the working zone.

A CLOSE CIRCUIT TELEVISION CAMERA (CCTV) for surveillance is fixed on every floor, in every classroom and areas that need regular monitoring.
